

In recognition of World Mental Health Day on 10th October we would like to say thank you to our staff and patients for being so kind. We appreciate that as patients you are currently waiting longer than normal to see us for treatment. This is due to an increase in demand for appointments coupled with longer appointment times to accommodate our Covid protocols.

We understand that this can be frustrating and would like to thank you for continuing to treat our team with respect. Looking after our team whilst providing you with the best possible service is of paramount importance to us.

Thanking you for your patience and for bearing with us during this difficult time, our very best wishes.

The Devonshire House Team
