

Here's what the judges had to say

## WINNER

PRACTICE OF THE YEAR SOUTH  
Devonshire House Dental Practice

As a well known and long-established referral practice this very large practice continues to go from strength to strength. We saw clear evidence of delighted referring practitioners who benefited not only from the care provided on behalf of their patients but also from the numerous training and mentoring opportunities provided by the practice.

With such a large team (Numbering 63 individuals.) the provision of quality training is essential in maintaining and improving standards. The judges noted clearly defined individual and team development programmes for tailored education.

Clever and ethically appropriate use of numerous social media vehicles has contributed to impressive growth in both referral numbers and turnover.

The addition of a renowned separate site laboratory has aided in the provision of consistent high-quality care. This also trades as a separate entity receiving praise of its own from clients and patients alike.

The Judges are sure that this enterprising practice will not rest on its laurels and will strive to continually improve, undoubtedly leading to further success and well-deserved recognition.
